

GIVE TO GEORGE'S

There are many ways to help us raise the £1million we need to make this a reality:

You can donate in person, by post or online.

Why not challenge your organisation or your friends and family to pull together and support the renal patients at St. Georges? From bake sales to sports days, every penny will help!

Could you go the extra mile and challenge yourself to take part in an event? Why not take on the Santa Run, or freefall from a plane?

CAMPAIGN FOR RENAL

Improving the lives of kidney patients
at St. George's Hospital

**ONCE A PERSON IS
DIAGNOSED WITH RENAL
FAILURE, THEY ARE
A PATIENT FOR LIFE.**

**HELP US RAISE
£1 MILLION
TO CREATE A WORLD
CLASS RENAL CENTRE
AT ST GEORGE'S HOSPITAL.**

Our vision is for the Courtyard Clinic at St George's Hospital to undergo a full renovation and refurbishment to create a state of the art renal centre for patients with kidney failure.

In particular, we want to bring the kidney dialysis and outpatient services back under one roof in a modern and purpose-built facility.

The new facility will provide:

- 9 additional bays, bringing the capacity to 15 patients per session. Patients must dialyse 3 times a week, for around 4 hours each time, and our clinical teams run 3 shifts each day. This increase in space would therefore mean we could care for an extra 54 patients every week.
- A new meeting and seminar room space, equipped with media technology that will enable the interactive training of staff, students and, importantly patients (learning the options available to them, including home care and transplants).
- Improve the comfort and experience of all our patients, whilst ensuring our amazing staff can also feel inspired, motivated and excited to work here. This includes enhancing the waiting area with art, creating a space where patients can talk and support each other whilst having treatment, and allowing the clinical teams to work even more closely together.

**MAKING
A DIFFERENCE**

Over 1,300 patients with kidney failure are treated each year at St George's Hospital. But right now, many of these patients are receiving blood dialysis in cramped, unsuitable conditions contained in temporary trailers in the car park. Access is via wobbly metal stairs and nurses have to store their supplies in a container outside.

**"HELP US IMPROVE
PATIENT'S EXPERIENCE
BY GETTING THEM OUT
OF THESE TEMPORARY
TRAILERS AND INTO
A STATE OF THE ART
RENAL DEPARTMENT"**
